Contents

VOLUME 19, NUMBER 1, MARCH 1994
Published 24 March 1994

ROLAND ALLEMAND, FRANCOIS POMPANON, FREDERIC FLEURY, PIERRE FOUILLET and MICHEL BOULETREAU
Behavioural circadian thythms measured in real-time by automatic image analysis: applications in parasitoid insects 1–8

ALEX R. KRAAIJEVELD and JACQUES J. M. VAN ALPHEN
Geographical variation in resistance of the parasitoid *Asobara tabida* against encapsulation by *Drosophila melanogaster* larvae: the mechanism explored 9–14

L. P. S. KUENEN and RING T. CARDÉ
Strategies for recontacting a lost pheromone plume: casting and upwind flight in the male gypsy moth 15–29

SARAH H. DANIEL and R. H. SMITH
Functional anatomy of the egg pore in *Callosobruchus maculatus*: a trade-off between gas-exchange and protective functions? 30–38

HOW-JING LEE and YEN-LI WU
Mating effects on the feeding and locomotion of the German cockroach, *Blatella germanica* 39–45

M. D. LÓPEZ-LEÓN, M. C. PARDO, J. CABRERO and J. P. M. CAMACHO
Dynamics of sperm storage in the grasshopper *Eyprepocnemis plorans* 46–50

L. P. LOUNIBOS
Variable egg development among *Anopheles (Nyssorhynchus)*: control by mating? 51–57

SUSAN W. NICOLSON
Pollen feeding in the eucalypt nectar fly, *Drosophila flavohirta* 58–60

M. A. WILLIS and T. C. BAKER
Behaviour of flying oriental fruit moth males during approach to sex pheromone sources 61–69

M. RENSHAW and H. HURD
Vitellogenin sequestration by *Simulium* oocytes: the effect of *Onchocerca* infection 70–74

YUELONG YANG and ANTHONY JOERN
Compensatory feeding in response to variable food quality by *Melanoplus differentialis* 75–82

TAKAO YOSHIDA and MASAHITO T. KIMURA
Some effects of low temperature on the photoperiodic clock in *Drosophila triauraria* 83–87

JAY A. YODER and MELISSA J. MOREAU
Pupurial wax restricts passive movement of water during diapause in the flesh fly 88–90

BOOK REVIEWS 91–94

VOLUME 19, NUMBER 2, JUNE 1994
Published 10 June 1994

J. D. ABISGOLD, S. J. SIMPSON and A. E. DOUGLAS
Nutrient regulation in the pea aphid *Acyrthosiphon pisum*: application of a novel geometric framework to sugar and amino acid consumption 95–102

J. GHAZOUL and P. G. WILLMER
Endothermic warm-up in two species of sphecid wasp and its relation to behaviour 103–108

I. D. HODKINSON, V. HEALEY and S. COULSON
Moisture relationships of the high arctic collembolan *Onychiurus arcticus* 109–114

NEIL J. OLDHAM, JOHAN BILLEN and E. DAVID MORGAN
On the similarity of the Dufour gland secretion and the cuticular hydrocarbons of some bumblebees 115–123

R. J. PROKOPY, B. D. ROITBERG and R. I. VARGAS
Effects of egg load on finding and acceptance of host fruit in *Ceratitis capitata* flies 124–132

KLAUS RICHTER and DANIELA BÄRWOLF
Behavioural changes are related to moult regulation in the cockroach, *Periplaneta americana* 133–138

ERICH STÄDLER, BEAT ERNST, JAKOB HURTER and ERNST BOLLER
Tarsal contact chemoreceptor for the host marking pheromone of the cherry fruit fly, *Rhagoletis cerasi*: response to natural and synthetic compounds 139–151

GEORGE D. YOCUM and DAVID L. DENLINGER
Anoxia blocks thermotolerance and the induction of rapid cold hardening in the flesh fly, *Sarcophaga crassipalpis* 152–158

A. RAFAELI and Z. KLEIN
Regulation of pheromone production by female pink bollworm moths *Pectinophora gossypiella* (Sanders) (Lepidoptera: Gelechiidae) 159–164

VOLUME 18, NUMBER 3, SEPTEMBER 1994
Published 1 September 1994

R. D. COLLINS, R. N. GARGESH, A. D. MALTBY, R. J. ROGGERO, M. K. TOURTELLOT and W. J. BELL
Innate control of local search behaviour in the house fly, *Musca domestica* 165–172

JOHN I. GLENDINNING and FRANK SLANSKY JR
Interactions of allelochemicals with dietary constituents: effects on deterrency 173–186

WOLFGANG H. KIRCHNER, INGRID BROECKER and JÜRGEN TAUTZ
Vibrational alarm communication in the damp-wood termite *Zootermopsis nevadensis* 187–190

P. ROESSINGH and S. J. SIMPSON
The time-course of behavioural phase change in nymphs of the desert locust, *Schistocerca gregaria* 191–197

VITERBO RODRÍGUEZ
Function of the spermathecal muscle in *Chelymorpha alternans* Boheman (Coleoptera: Chrysomalidae: Cassidinae) 198–202

S. TRUMPER and S. J. SIMPSON
Mechanisms regulating salt intake in fifth-instar nymphs of *Locusta migratoria* 203–215

URMAS TARTES and AARE KUUSIK
Periodic activity and its possible functions in pupae of *Tenebrio molitor* 216–222

L. A. MOSKALYK and W. G. FRIEND
Feeding behaviour of female *Aedes aegypti*: effects of diet temperature, bicarbonate and feeding technique on the response to ATP 223–229

F. WALCHER and K. KRAL
Visual deprivation and distance estimation in the praying mantis larva 230–240

VOLUME 18, NUMBER 4, DECEMBER 1994
Published 22 December 1994

ELSPETH BARTLET, NUNZIO ISIDORO and INGRID H. WILLIAMS
Antennal glands in *Psylliodes chrysocephala*, and their possible role in reproductive behaviour 241–250

A. BLACKWELL, C. DYER, A. J. MORDUE (LUNTZ), L. J. WADHAMS and W. MORDUE
Field and laboratory evidence for a volatile pheromone produced by parous females of the Scottish biting midge, *Culicoides impunctatus* 251–257

MARIE-CLAIRE CAMMAERTS and ROGER CAMMAERTS
Thin-layer chromatographic isolation of the trail pheromone of the ant *Pheidole pallidula* 258–264

THOMAS A. CHRISTENSEN, JASON M. LASHBROOK and JOHN G. HILDERBRAND
Neural activation of the sex-pheromone gland in the moth *Manduca sexta*: real-time measurement of pheromone release 265–270

I. S. DE LIMA, P. E. HOWSE and L. A. B. SALLES
Reproductive behaviour of the South American fruit fly *Anastrepha fraterculus* (Diptera: Tephritidae): laboratory and field studies 271–277

JIM HARDIE, J. H. VISSER and P. G. M. PIRON
Perception of volatiles associated with sex and food by different adult forms of the black bean aphid, *Aphis fabae* 278–284

K. A. EVANS and L. J. ALLEN-WILLIAMS
Laboratory and field response of the pollen beetle, *Meligethes aeneus*, to the odour of oilseed rape 285–290

V. FOURCASSIÉ and J. L. DENEUBOURG
The dynamics of collective exploration and trail-formation in *Monomorium pharaonis*: experiments and model 291–300

RAMON GONZÁLEZ, ALFREDO ÁLVAREZ and MERCEDES CAMPOS
An electroantennogram apparatus for testing the activity of semiochemicals on the olive beetle, *Phloeotribus scarabaeoides* (Coleoptera: Scolytidae): first recordings of the response to ethylene 301–306

J. W. HARGROVE
Reproductive rates of tsetse flies in the field in Zimbabwe 307–318

SEAU-FENG HONG and D. S. SAUNDERS
Effects of constant light on the rhythm of adult locomotor activity in the blowfly, *Calliphora vicina* 319–324

JOHN R. B. LIGHTON, MICHAEL C. QUINLAN and DONALD H. FEENER JR
Is bigger better? Water balance in the polymorphic desert harvester ant *Messor pergandei* 325–334

P. OLIVIER ZANEN, MAURICE W. SABELIS, JOHN P. BUONACCORSI and RING T. CARDÉ
Search strategies of fruit flies in steady and shifting winds in the absence of food odours 335–341

JOSÉ-LUIS MAESTRO, MARIA-DOLORS DANÉS, MARIA-DOLORS PIULACHS, PIERRE CASSIER and XAVIER BELLÉS
Juvenile Hormone inhibition in corpora allata from ovariectomized *Blatella germanica* 342–348

R. MEYHÖFER, J. CASAS and S. DORN
Host localization by a parasitoid using leafminer vibrations: characterizing the vibrational signals produced by the leafmining host 349–359

YVAN PELLETIER and COLIN MCLEOD
Obstacle perception by insect antennae during terrestrial locomotion 360–362

MICHAEL T. SIVA-JOTHY and YOSHITAKA TSUBAKI
Sperm competition and sperm precedence in the dragonfly *Nanophya pygmaea* 363–366

W. ANDY SNEDDEN, COLIN R. TOSH and MICHAEL G. RITCHIE
The ultrasonic mating signal of the male lesser wax moth 367–372

JAY A. YODER, DAVID B. RIVERS and DAVID L. DENLINGER
Water relationships in the ectoparasitoid *Nasonia vitripennis* during larval diapause 373–378
